

NOTICE OF POLICY: ELECTRONIC CIGARETTE (E-CIG) BATTERIES

July 19, 2017

Constraints on taking e-cigarette batteries

Due to the dangers involved with handling e-cigarettes and their nicotine cartridges, the Call2Recycle® program is very limited in how it can handle the batteries that power them. In most cases, batteries used in e-cigarettes are not intended to be removed by the consumers. However, in some cases, the batteries are removable.

If the battery (indicated in the diagram below) can be removed, separated and collected, the Call2Recycle program can accept it. Otherwise, we are unable to accept these devices.
